Examples of General Threats

Ed Schneider
eschneider@ida.org
10 March 1999

Purpose

- **To identify general examples of what consumers care about**
 - **Test of proposed taxonomies**
 - **Identify gaps in current threat databases**
- **To identify common methods of expressing and cataloguing them**

Uses of Threat Database

- **Writing PPs and STs**
- **Developing security requirements**
- **Certification and Accreditation**

Issues

- **Generality**
 - **Problem domain**
 - **Level of detail, both depth and breadth**
- **Who decides which threats belong**
- **How are threats organized**

Issues

- **Similar threats are tagged with different threat identifiers in different profiles.**
- **The same threat identifier may be used in different profiles to refer to different threats.**
